

COOL TO BE SEEN!

Make your very own Little Learners armband to stand out at night. Stick tinfoil shapes onto it so your armband will shine in cars headlights.

Your teacher will give you some cool, bright stickers to add to your armband so it's easier for cars and drivers to see you in the daytime too. You can make it even brighter with coloured pens.

When you've finished, get a grown-up to cut it out and stick it onto a piece of card. Then wear your colourful armband and be safe.

Teacher's Note: This activity would be suitable for the Creative – imagination/art and craft part of the curriculum.
